Warm power, noble wood

Imposing, surprising, innovative, confronting. Knockonwood is the very first radiator made of wood. The beautifully designed simple yet elegant covering has been finished with the noblest veneer. Durable wood that curves gracefully along the wall. Knockonwood's warm power radiates from its Low-H₂O core, which guarantees energy savings and a higher warmth output. Available in 9 different types of wood.

Casing

- The wooden covers are finished with a scratch-resistant polyurethane varnish, gloss degree 40%. High UV resistance.
- Price category 1:
 - Oak natural
 - Beech natural
 - Maple natural
 - Zebrano natural
- Price category 2:
 - Oak bleached
 - Beech bleached
 - Mahogany
 - Oak wenge-coloured
 - Walnut
- Metal parts: sandblast grey metallic (001)
- The valve and its connections are concealed within the standard casing.
- The surface temperature of the casing stays safe to touch, even at a water temperature of 90°C. Complies with the safety requirement DHSS DN4.
- The casing can be removed in its entirety for cleaning and maintenance.
- a 10 year guarantee

Low-H₂O heat exchanger

- of pure copper and aluminium, totally non-corrosive
- a 30 year guarantee
- pressure tested: 20 bar
- standard with extended air vent with transparent synthetic drain tube.
- with dirt-repellent and dust-proof lacquer in graphite grey (RAL 7024)
- high heat output achieved with normal and lower flow temperatures
- efficient: rapid heating up speed due to super low water content
- the optimal combination of convection and radiation

High efficiency boiler combination

Thanks to its low water content and high coefficient of heat conduction for low flow temperatures, the Knockonwood, with its modern Low-H₂O element, is ideal to use in combination with high efficiency boilers and/or condensing technology.

Twin Power, DBE or Oxygen?

Knockonwood is also available

- as DBE or Oxygen radiator: see price list "Top performers".
- with the super-powered Twin heat exchangers. The boiler temperature is on average 15% lower for equivalent radiator dimensions!

Knockonwood_Dimensions

KNOW_Knockonwood Wall

Dimensions in cm

Type	B	d	h min*	h1 min*
06	10.8	4.6	10	5
10-11	12.8	5.2	10	5
15-16	17.8	7.7	12	5

* Smaller dimensions can decrease output.

Connections

Jaga Comap valve to the wall

Jaga Comap valve to the floor

The valves offered by Jaga are totally concealed within the standard casing. Detailed info: see Connection sets and valves.

Jaga Pro valve to the wall

Jaga Pro valve to the floor

Jaga valve to the wall

Jaga valve to the floor

Jaga type 6 valve to the wall

The Jaga type 6 valve: with short connection distance, special for Knockonwood type 06 connection to the wall. See p. 167/175.

Type	d	A
06	4.6	1.8
10-11	5.2	2.9
15-16	7.7	5.3

Knockonwood_Options

Top valve _____

When ordering a top valve, add to the code of the Knockonwood /30 (top left) or /60 (top right).
Ex.: KNOW. 030 060 06.xxx/60

DBE & Oxygen version _____

DBE: the smallest and most powerful radiator.
Oxygen: for healthy heat and clean air.
See price list "Top performers".

CODE	H casing
5090.1300101 right	30
5090.1300102 left	30
5090.1300600 right and left	55
5090.1301000 right and left	80

Thermostatic head not included: see Connection sets & valves page 178-179.

Brush _____

For easy cleaning of the underside of the Low-H₂O heat exchanger without detaching the casing.

CODE
5090.001

Fixing calorimeter holder _____

See Special Products.

Output measured in accordance with EN442, at a water temperature of 75/65°C and a room temperature of 20°C (ΔT=50).

Knockonwood_Wall mounted model

Standard delivery

- complete casing in one piece with wooden cover
- Twin Low-H₂O heat exchanger type 08
- wall brackets
- fixing kit
- extended air vent 1/8"
- drain cock 1/2"

Connection

- standard connection: bottom end left or right, valve position 20 or 70
- for option top valve, add to the code of the Knockonwood /30 (top left) or /60 (top right)
- ex.: KNOW. 030 060 06.xxx/60
- for remote controlled valve: see Special products
